# Welcoming your support

**William Harvey Research** needs new funding to ignite further acceleration of medical technology and research, to increase our chances of discovering more cures to more diseases.

**100%** of all donations to the Foundation are used entirely to support research at WHR. During the last ten years, we awarded 68 grants, totalling **over £3,000,000**. To make a vital difference to patient outcomes we now need to raise **£5m** over the next five years to use new technology to investigate more diseases which have previously been ignored. With exciting new and emerging technology and a global centre of intellectual excellence, we want to capitalise and be in the vanguard of this pioneering era of innovation.

## Your donations will fund:

- Innovation Awards through our global-standard peer-review process. These **kick-starter investments** will allow us to test more ideas of more scientists more quickly and enable the best of these to move on to larger-scale research much sooner;
- **More researchers and more equipment** to expand our world-leading multi-disciplinary teams. This will speed up the pace of scientific discovery to meet the urgent medical needs;
- Professors of Therapeutic Innovation dedicated to research, free of teaching and administration duties. They will lead teams in the early **development of new medicines**, the refinement of treatments using the onsite genomics expertise and the re-purposing of existing drugs.
